WOHL uses only verified, secured electronic signatures on reports.

These signatures are as valid as original handwritten signatures.

If you have any questions regarding this report please feel free to contact the laboratory via email (as listed above) or via telephone at 800-446-0403

Analytical Results

LAB NUMBER	FIELD NUMBER	DESCRIPTION	AIR VOLUME
	1450797	SKC 226-98	92.9 liters
SHIL1012AM001			
Alkanolamine IC Scan			
Diethanolamine	<5.0 $\mu\text{g}/\text{sample}$	<0.054 mg/m^3	<0.013 ppm
Ethanolamine	<2.0 $\mu\text{g}/\text{sample}$	<0.022 mg/m^3	<0.0086 ppm
Triethanolamine	<20 $\mu\text{g}/\text{sample}$	<0.22 mg/m^3	<0.035 ppm

Displayed values on report have been rounded; however all calculations are performed using raw, unrounded intermediate results. Please contact the laboratory if you have any questions regarding our result calculation or rounding. All samples were received by the laboratory in acceptable condition unless otherwise noted.

< : Less Than. The analyte, if present, is at a level too low to be accurately quantitated by the method used.
The actual amount is less than the reported value.

Analytical Methodology

MONO-, DI-, AND TRIETHANOLAMINES:

Samples were analyzed by WOHL method WI020eth.9 based on literature from DIONEX corporation.

Samples are collected on H₃PO₄ treated XAD-7 tubes. The front and back sections of the tubes are each desorbed in 10 mls of deionized water. Samples for triethanolamine only can be collected on glass fiber filters which are desorbed in a weak sulfuric acid solution. Samples are then analyzed by Ion Chromatography using a cation separator column and an electrochemical detector with a gold working electrode and a silver/silver chloride reference.

Results are expressed as milligrams per cubic meter if the air volume is provided, otherwise as ug/sample. Sample are not blank corrected unless otherwise noted in the analytical comments.

REPORTING LIMITS:

This table contains the WOHL determined reporting limits for the compounds specified in this report. These numbers are based on the historical statistical data for a particular analyte or are based on WOHL determined values. If no value appears for an analyte in the table, the RL value is the same as the previous value.

<u>Analyte</u>	<u>Reporting Limit</u>
Diethanolamine on SKC 226-98	5.0 $\mu\text{g}/\text{sample}$
Ethanolamine on SKC 226-98	2.0 $\mu\text{g}/\text{sample}$
Triethanolamine on SKC 226-98	20 $\mu\text{g}/\text{sample}$

Analytical Quality Control

Laboratory prepared quality control (QC) samples were analyzed along with the samples included in the analytical report. The analysis results for these QC samples are listed below.

Instrument Used for Analysis: Dionex DX-500

Laboratory Control Sample: 142607

QC Sample Media: H3PO4 Treated XAD-7

<u>Analyte</u>	<u>Target Value</u>	<u>Recovery (%)</u>	<u>Acceptable Recovery (%)</u>	<u>Pass/Fail</u>
Ethanolamine by IC	50.8 µg/sample	103.5	61 - 139	PASS

Laboratory Control Sample: 142608

QC Sample Media: H3PO4 Treated XAD-7

<u>Analyte</u>	<u>Target Value</u>	<u>Recovery (%)</u>	<u>Acceptable Recovery (%)</u>	<u>Pass/Fail</u>
Ethanolamine by IC	152.2 µg/sample	100.5	61 - 139	PASS

The acceptable range for an analyte is based on the standard deviation of each analyte, which has been determined from statistical evaluation of the historical performance of the assay. The acceptable range includes up to 3 standard deviations, so a result within 3 standard deviations is considered to have passed the QC requirements. A result outside of the acceptable range is considered to have failed QC and may indicate the direction of possible bias for the samples included in the analytical report. The analytes used for QC determination will not always be the same analytes that appear in the samples for the report, however they are representative of the compounds found in the samples and indicative of overall assay performance.

End of Analytical Report

The results in this report apply only to the samples, specifically listed above, tested at the Wisconsin Occupational Health Laboratory .
This report is not to be reproduced except in full.

Date Analyzed: 19-OCT-10

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

Date Sampled : 17-OCT-10 Account No.: 13913
Date Received: 19-OCT-10 Login No. : L226365
Date Analyzed: 19-OCT-10

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

Date Analyzed: 19-OCT-10

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

Date Analyzed: 19-OCT-10

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

L226366 (Report ID: 667666):
SOPs: in-vocs(14)
The laboratory control sample (LCS) was outside the control limits of 70-130% at 141% recovery for Propylene. Reported results are not affected since samples are non-detect and bias is high.
The laboratory control sample duplicate (LCSD) was outside the control limits of 70-130% at 141% for Propylene and at 133% for 1,3-Butadiene. Reported results are not affected since samples are non-detect and bias is high.

LABORATORY FOOTNOTE REPORT

Client Name : Center for Toxicology & Env. Health LLC
 Site :
 Project No. : 40047
 6601 Kirkville Road
 East Syracuse, NY 13057
 (315) 432-5227
 FAX: (315) 437-0571
 www.galsonlabs.com

Date Sampled : 15-OCT-10 - 18-OCT-10 Account No.: 13913
 Date Received: 19-OCT-10 Login No. : L226368
 Date Analyzed: 19-OCT-10

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

L226368 (Report ID: 667665):

SOPs: 11-n5506(7)

Results corrected for matrix and compound-specific desorption efficiencies.

Parameter	Method	PEL
1-Nitropyrene	mod. NIOSH 5506; HPLC/UV-FL	N/A

 6601 Kirkville Road
 East Syracuse, NY 13057
 (315) 432-5227
 FAX: (315) 437-0571
 www.galsonlabs.com

Date Sampled : 15-OCT-10 - 18-OCT-10 Account No.: 13913
 Date Received: 19-OCT-10 Login No. : L226368
 Date Analyzed: 19-OCT-10 - 20-OCT-10

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

L226368 (Report ID: 667665):

SOPs: 11-n5506(7)

Results corrected for matrix and compound-specific desorption efficiencies.

Parameter	Method	PEL
1-Nitropyrene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Acenaphthene	mod. NIOSH 5506; HPLC/UV-FL	N/A

LABORATORY FOOTNOTE REPORT

Client Name : Center for Toxicology & Env. Health LLC
 Site :
 Project No. : 40047
 6601 Kirkville Road
 East Syracuse, NY 13057
 (315) 432-5227
 FAX: (315) 437-0571
 www.galsonlabs.com

Date Sampled : 18-OCT-10	Account No.: 13913
Date Received: 20-OCT-10	Login No. : L226486
Date Analyzed: 20-OCT-10	

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).

L226486 (Report ID: 667808):

SOPs: il-n5506(7)

Results corrected for media and compound-specific desorption efficiencies.

Parameter	Method	PEL
<hr/>		
1-Nitropyrene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Acenaphthene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Acenaphthylene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Anthracene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Benzo(a)anthracene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Benzo(a)pyrene	mod. NIOSH 5506; HPLC/UV-FL	0.2 mg/m ³
Benzo(b)fluoranthene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Benzo(e)pyrene	mod. NIOSH 5506; HPLC/UV-FL	N/A
Benzo(g,h,i)perylene	mod. NIOSH 5506; HPLC/UV-FL	N/A
